CENTRAL INTELLIGENCE AGENCY
WASHINGTON, D.C. 20505

27 September 1982

MEMORANDUM FOR: Peter B. Clark
Chief, US International Transaction Section
Federal Reserve Board

FROM: [REDACTED]
Chief, ASG/AC/Information Resources Branch

SUBJECT: United States: Level and Commodity
Distribution of US Exports

STAT

1. In response to your communication last Wednesday [REDACTED] we are providing you with trade data statistics highlighting the trade patterns and commodity mix of US exports to various markets around the world.

STAT

2. You will notice that a comparison of total US exports to the world with data provided from other sources may differ markedly over the last few years. For example, in 1979, US exports valued around \$182 billion, but the UN reported only \$176.8 billion. The difference is primarily \$5 billion of non-monetary gold shipments, which the UN excludes from SITC VI trade statistics.

3. We hope you will find these data suitable for your needs; should you have additional inquiries, feel free to contact [REDACTED]

STAT

Attachment.
As stated
